PROFESSIONAL SUMMARY

Healthcare data analytics professional with 13+ years of experience building dashboards, automation, and predictive models in CMS, HEDIS, MSSP, and ACO environments. Led an IT and analytics function supporting executives, clinicians, operations, and sales, and automated CMS Gaps-in-Care analysis from 4-5 weeks to 2-3 days. Skilled in SQL, Python, and Power BI, with a record of turning data into decisions in regulated settings.

SKILLS

Data & Modeling: SQL (PostgreSQL), Python (Pandas, NumPy, scikit-learn), Feature Engineering, Statistical Analysis, Predictive Modeling

BI & Reporting: Power BI, Tableau, Excel/Power Query, KPI Development, Executive Dashboards, Data Storytelling

Data Engineering & Delivery: ETL/ELT, Data Validation, dbt and Snowflake (working knowledge), SDLC, Agile, Jira, Confluence

Domain: CMS Quality Reporting, HEDIS, MSSP/ACO Analytics, Claims & Cost Analysis, Healthcare Operations

PROFESSIONAL EXPERIENCE

Director of Information Technology (SDLC Modernization & Analytics) | KPN Health Inc. | Remote | Feb 2021 – Dec 2025

- Modernized the software development lifecycle with Agile delivery, Jira, and Confluence, cutting delivery time for requested feature changes from 16 weeks to 3 weeks.
- Built dashboards and automated reporting in Power BI for Executive, Clinical, Operations, and Sales teams, cutting manual reporting time 50% and improving data accuracy 35%.
- Presented insights on utilization trends, cost drivers, and performance to executive leadership to inform product and operational decisions.
- Built real-time module-usage reporting to track client engagement and guide product strategy.
- Supported CMS/HEDIS reporting across 3 initiatives, enabling the ACO to target resources, training, and guidance so 271 provider locations could meet CMS reporting goals.
- Managed a team of 7 Data Engineers, Front-End Developers, and contractors.

Product Solutions Specialist / Analytics Lead | KPN Health Inc. | Dallas, TX (Hybrid) | Sep 2018 – Feb 2021

- Automated consolidation of hundreds of provider files into an Excel/Power Query dashboard using Python, cutting CMS Gaps-in-Care analysis from 4-5 weeks to 2-3 days (~90%). Productized as a monthly module, moving ACO reviews from twice yearly to monthly (~30-day lag) to support off-track providers early.
- Introduced Agile practices, cutting average project delivery time 63% (16 to 6 weeks) by parallelizing work across developers.
- Built a provider-level import-monitoring dashboard, raising daily import success from 82% to 98% and cutting the failure rate 89%.
- Automated error-log-to-Jira ticketing, cutting clients' maximum missing-data gap 92% (24 to 2 hours).
- Built a COVID-19 comorbidity dashboard (heatmaps, risk filters, death-rate projections) to guide high-risk patient outreach.
- Built an MSSP/ACO performance dashboard across thousands of organizations, narrowing the field to the top 50 sales prospects.
- Built an internal module-usage tracker that replaced assumption-based roadmap decisions with usage data.

Analytics Manager, Network Operations | NextNav LLC | Remote | Jun 2012 – Aug 2018

- Managed analytics for network performance and location accuracy across 21 metro markets and 14 states.
- Analyzed large operational datasets to identify optimization opportunities, reducing system errors 30%.
- Developed GIS-based analytics tools that cut annual operating costs by approximately $50,000.

SELECTED PROJECTS (2026)

- **CMS Gaps In Care Dashboard:** Python ETL and Excel/Power Query dashboard consolidating 450+ files across 85 practices and 34 CMS quality measures.
- **Hospital Operations Analysis:** Python and Power BI analysis of 985 synthetic patient records; 3 conditions drove 62% of costs, $1.2M in potential savings.
- **Digital Wellness Behavioral Analysis:** Python/scikit-learn model explaining ~86% of mental health score variance; Looker Studio dashboard.
- **SQL B2B Marketing Performance Analysis:** PostgreSQL analysis of $10.4M in revenue; top 10 accounts hold 15.3%, with a 164% Northeast–Midwest gap.

EDUCATION & CERTIFICATIONS

B.S. Electrical Engineering, The University of Texas at Arlington

Associate Data Engineer in SQL, DataCamp (2026) | Associate Data Analyst in SQL, DataCamp (2026)

Business Intelligence Data Analyst Career Path, Codecademy (2026) | Healthcare Data Science & Claims Analytics, Udemy (2022)
